Embracing A New Learning Experience of Edutainment

What is MonsoonSIM ERP Competition?

MonsoonSIM Enterprise Resource Planning Competition is a yearly inter-varsity competition hosted by Monsoon Academy and its partners.

The competition is a high-energy event involving students and lecturers with the objective of exposing students to the concept of enterprise resource planning (ERP) through fun and exciting simulation games.

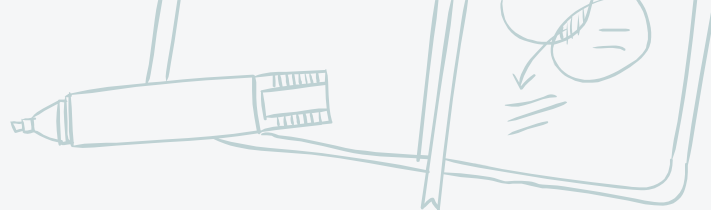

Students who come together in teams of 4 or 5 will be assigned to run a virtual company to compete with other virtual companies. Players will **LEARN** --- all at the same time -- how to run a large virtual enterprise and **COMPETE** with other teams for the highest **PROFIT**.
